For free text messages to mobile phones via your web browser check: <http://www.cbfsms.com/>
(your IP address may be traceable so keep it polite and your totally legal)

For anonymous email use google "anonymous web mail" before deciding, safest route is download
tor browser: <https://www.torproject.org/projects/torbrowser.html.en> then set up a free email
account with hotmail or google using false details. Again if you are polite there is nothing illegal
about emailing someone and asking them a question.

A few questions, but please do add more of your own:

Will persons involved in attacks on sabs be kicked out of the hunt?

If not, why not?

Do you accept that attacking sabs can potentially escalate violence and is ultimately futile given that
saboteurs have been doing what they do for over 50 years?

Why was no official apology been issued by the hunt yet?

Do you accept that blocking in an ambulance that is trying to tend to an injured person is not only
criminal but also likely to lead to reprisals?
